

LCS-6380 PCI USB Card

**2-Ports
USB 3.0**

The USB 3.0 2 Ports PCIe adapter **LCS-6380** is a dramatic performance increase over the standard USB 1.1. Whereas the USB 1.1 is only 12Mbits/s, the USB 2.0 Hi-Speed specification is up to 480Mbits/s and USB3.0 Super-Speed is up to 5Gbps. The USB 3.0 2 Ports PCIe adapter with its higher bandwidth will be ideal for high speed devices such as higher resolution video conferencing cameras, and the next generation scanners, printers, and fast storage devices. The USB 3.0 2 Ports PCIe adapter is "backwards-compatible" which means it will also work with all the older legacy USB 1.1 peripherals. In fact, USB 3.0 2 Ports PCIe adapter supports USB 1.1 and USB 2.0 devices connected simultaneously with no loss in performance of either.

Features:

- ◆ Compliant with Universal Serial Bus 3.0 specification revision 1.0
- ◆ Supports the following speed data rates as follows:
- ◆ Low-speed (1.5Mbps) / Full-Speed (12Mbps) / High-Speed (480Mbps) /Super-Speed (5Gbps)
- ◆ Supports 2 downstream ports for all speeds
- ◆ Supports all USB compliant data transfer types as follows:Control /Bulk /Interrupt / Isochronous transfer
- ◆ Supports USB legacy function
- ◆ Compliant with PCI Express Base Specification 2.0
- ◆ Supports PCI Bus Power Management Interface Specification revision 1.2
- ◆ Bus Interface:PCI-Express x 1
- ◆ Low-Profile Version available

System Requirements:

- ◆ Windows® XP/Vista/7 (32/64 bit)
- ◆ PCI Express-enabled system with an available PCI Express slot IBM compatible Pentium 266 MHz

Specifications:

Standard:	USB 3.0
Chipset:	NEC 720200
Ports:	2 x USB external,
Operating System:	XP/Vista/7 , MAC OS 10, Linux 9.3 and higher
Interface:	PCIe
Box contains:	USB Card,
EAN:	4016621006242
